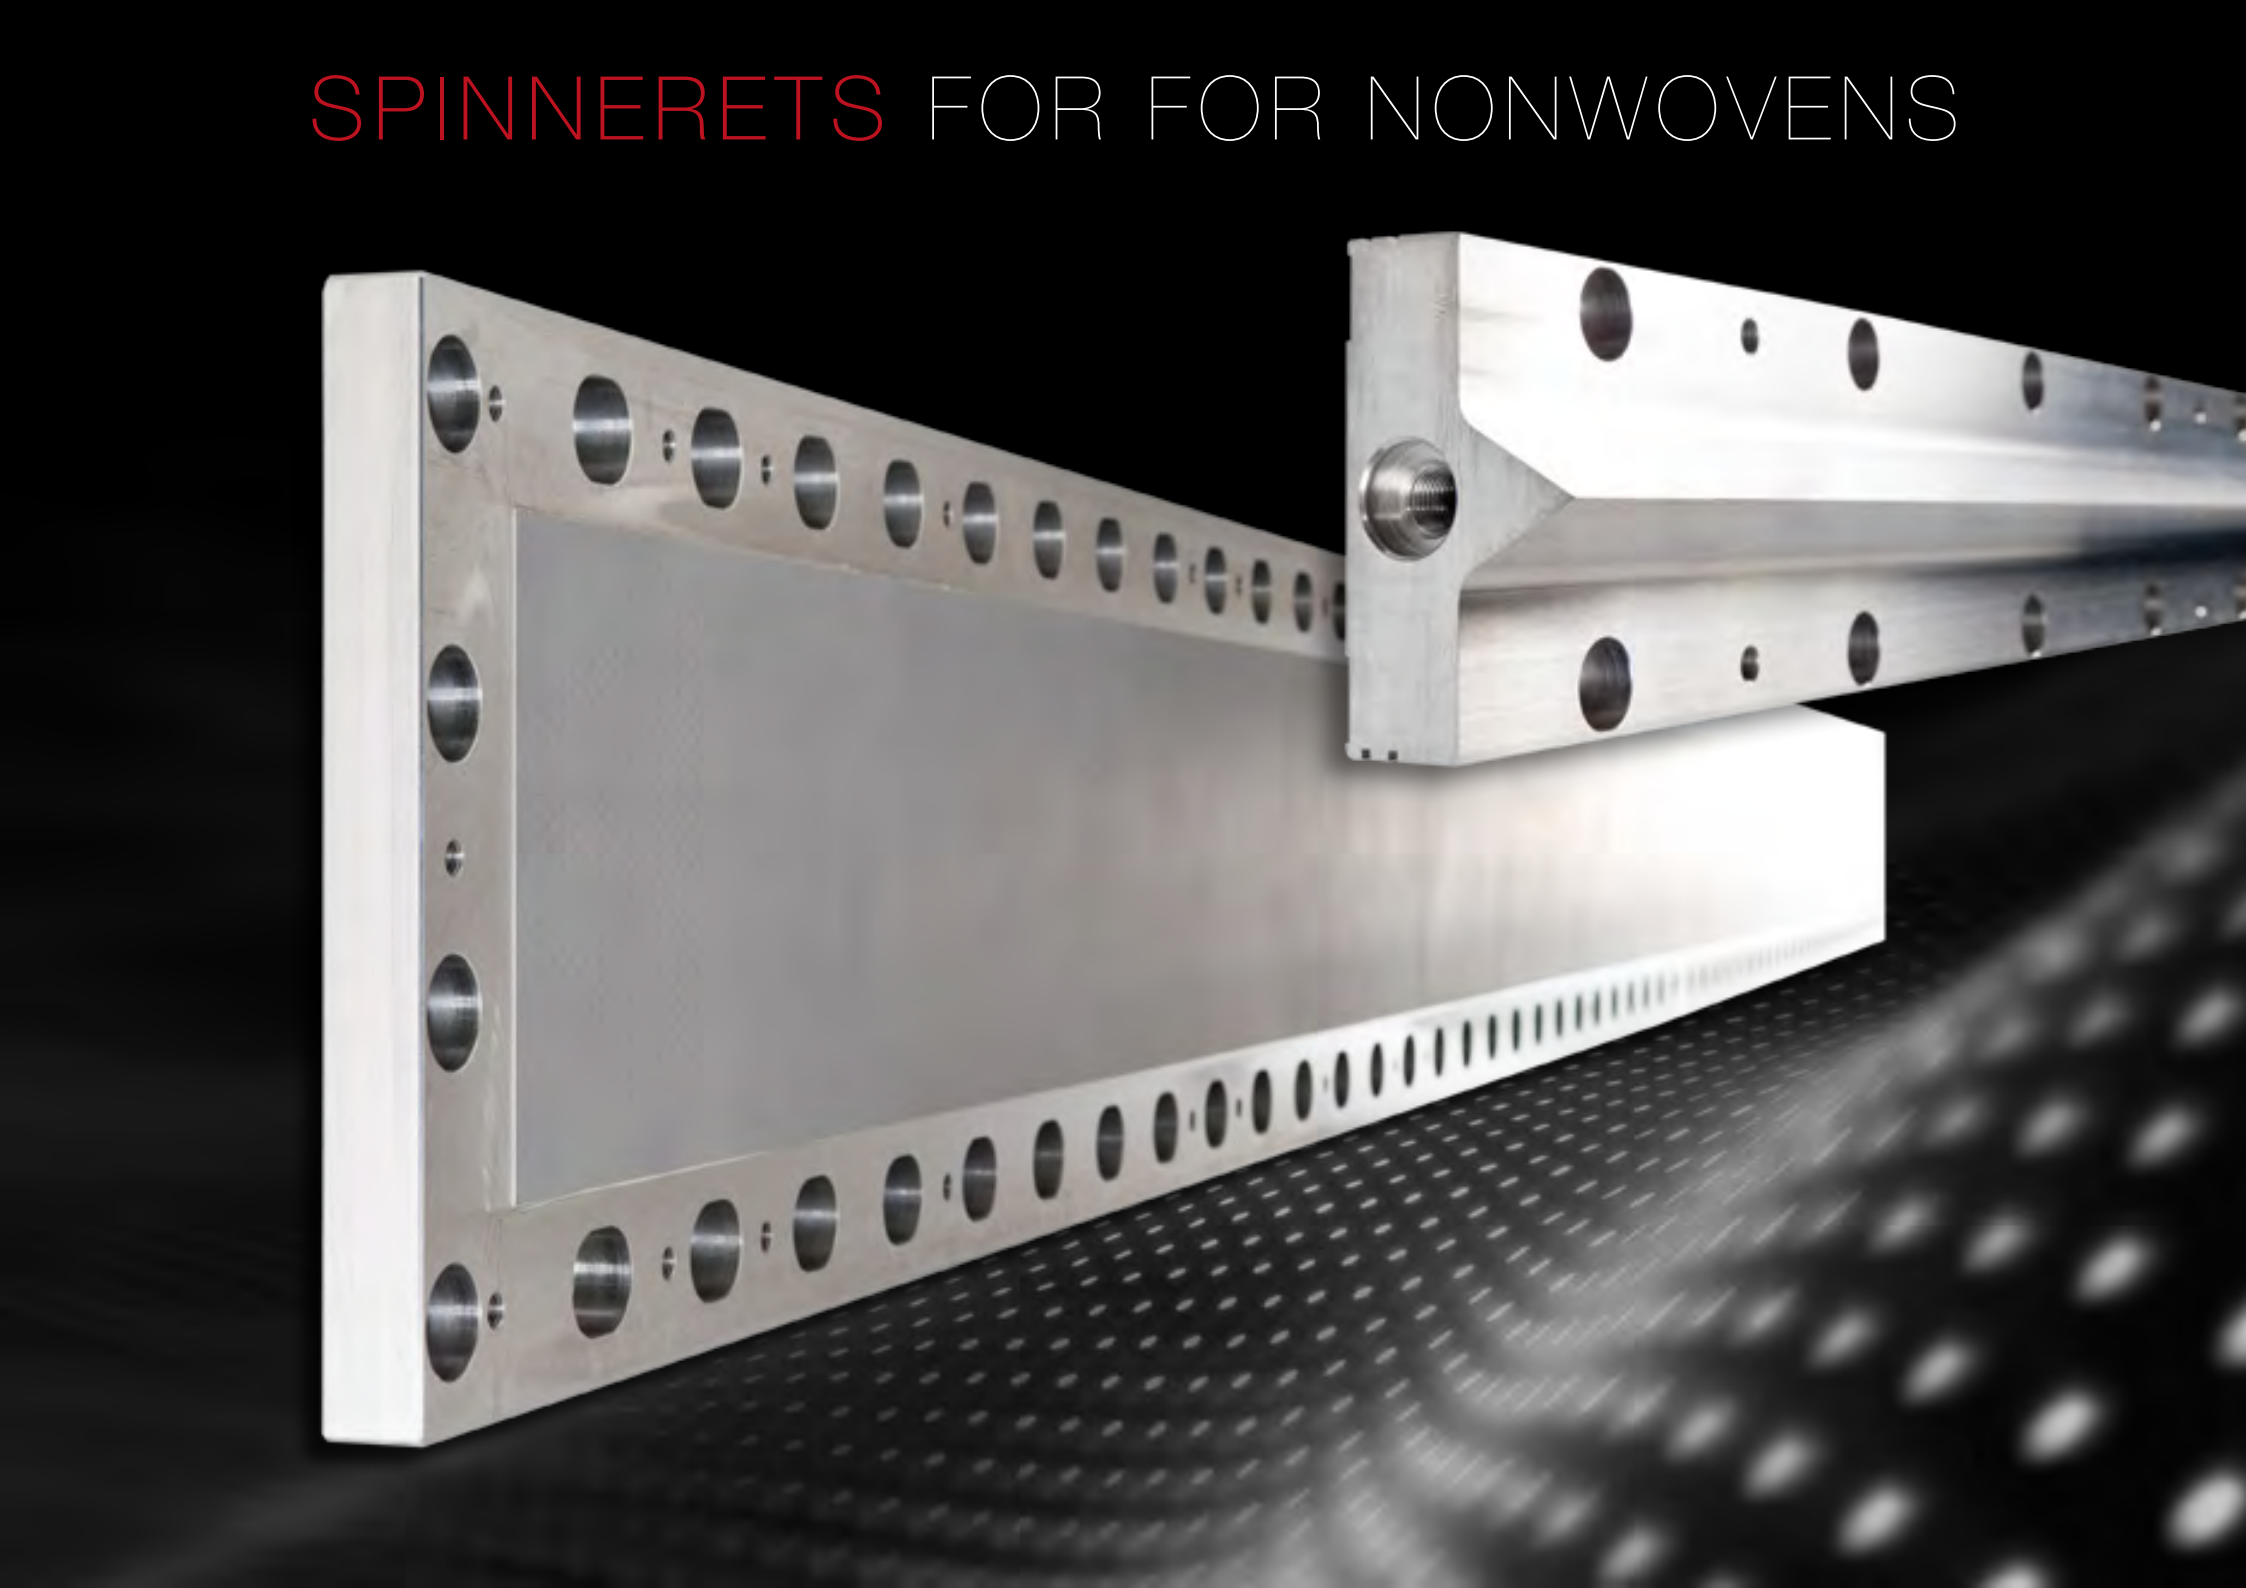
SPINNERETS FOR FOR NONWOVENS

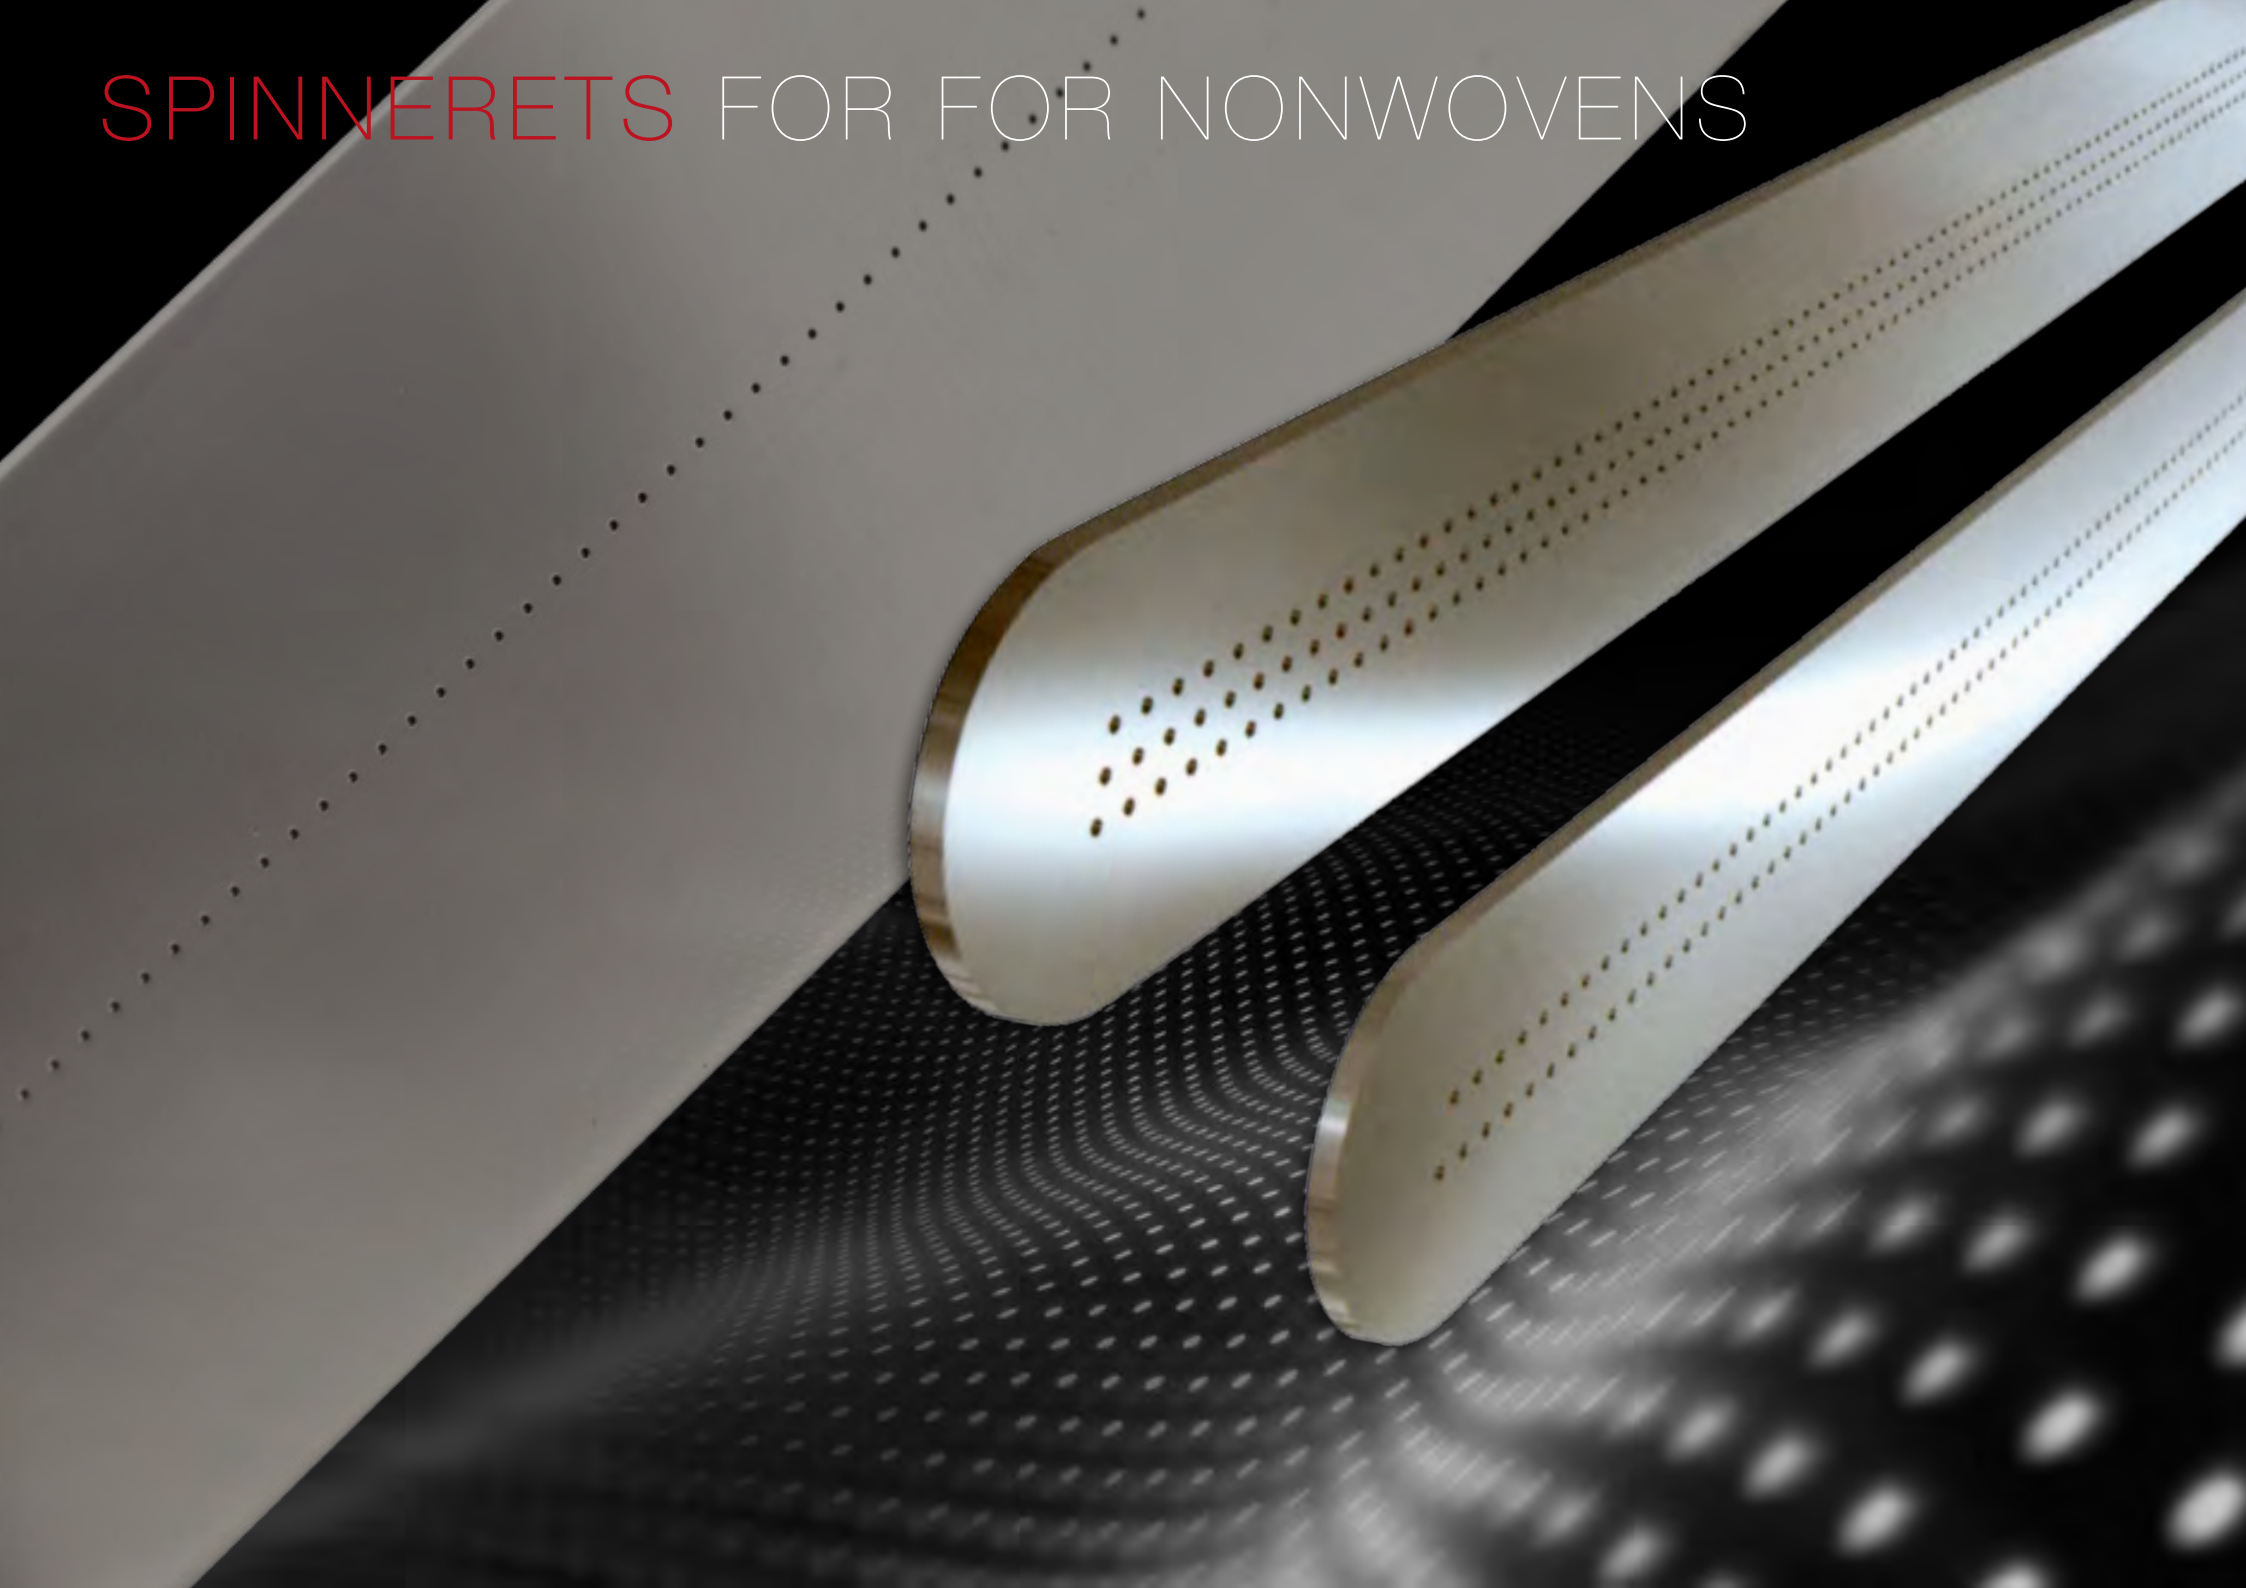


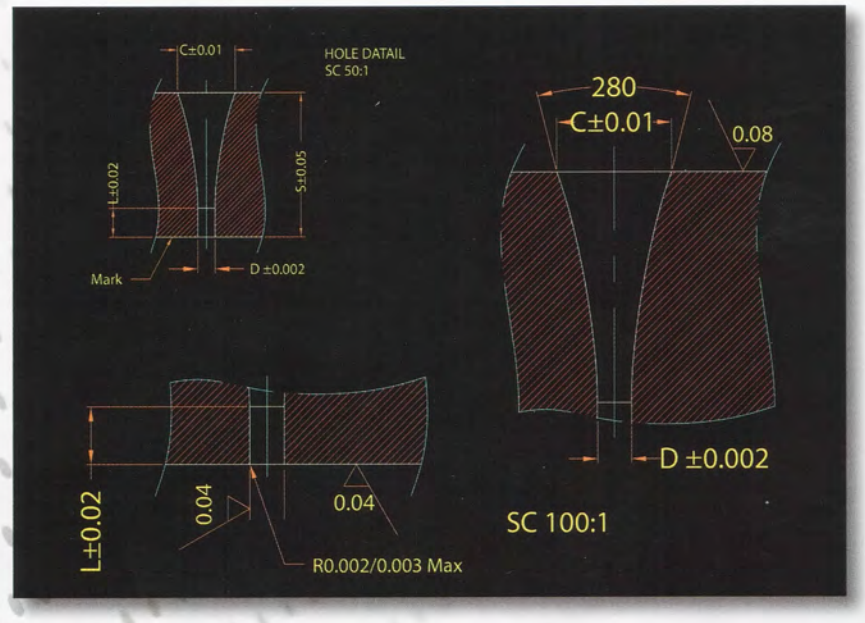
SPINNERETS FOR NONWOVENS

Ceccato is the leading company in producing Spunbond spinnerets, Meltblown dies and Spunlace strips for the Nonwoven industry. Ceccato supplies these products to all major machinery makers in Europe, as well as to all major Nonwoven fiber producers worldwide and enjoys an excellent reputation on all continents.

We differentiate 2 types of spinnerets namely: Spunbond spinnerets, Meltblown dies and Hydroentanglement jets.

SPINNERETS FOR FOR NONWOVENS





SPINNERETS FOR NONWOVENS

Ceccato can manufacture these products up to 9 meter in length. Typical lengths, however, range from 3,6 - 5,6 meters. Considering the exceptional length, we developed new processes for machining, drilling and cleaning.

On a Spunbond spinneret Ceccato can put more than 40'000 holes and on Meltblown dies more than 50 holes per inch. Ceccato enjoys a worldwide leadership in these products.
